Domain	Media and Entertainment

Project Description:

- The project is about developing an application which can be used by different production studios to manage their workflow during translation of their movies, tv series, etc.
- The application saves translation data entered by various translators which they can refer during making movie production and also during translating other movies, tv series , etc.
- End users of this application until now are Warner Bros., Amazon and Walt Disney.
- The project also demands me to test the application using Karma and Jasmine unit test case framework.

Roles and Responsibilities in the project:

- Analysing the requirements received from the client.
- Working on designing and coding.
- Fixing issues and defects.
- Performing code reviews.
- Participating in relevant technical and verbal communication with the client.
- Deployment and Unit Testing.
